

The Diamond Difference means results

Since its founding in 1890, Diamond Chain has been singularly focused on producing the best roller chain. The Diamond Difference is a commitment to quality that ensures you only receive the highest quality chain for your application.

But what exactly is the Diamond Difference? It's...

◆ PERFORMANCE

◆ RETURN ON INVESTMENT

◆ COMMITMENT

Performance

With strict manufacturing standards, from materials to post-assembly, Diamond Chains offers the highest tensile strength, fatigue strength, and wear performance. While the uniquely beveled linkplates and proprietary lubrication are easily identifiable, the real value of Diamond Chain is not seen, but experienced.

Return on Investment | REAL LIFE RESULTS

5 Year Savings: **\$1,209,145**

Commitment

Diamond Chain is committed to its partnerships with industrial distributors, making sure to continually stock distribution centers with standard Diamond® chain products. And for all your Made-to-Order (MTO) needs, the Diamond Dash program ships custom attachment chains in varying lengths. Orders up to 100 feet ship within 3-5 working days and chains up to 500 feet ship within 10-15 working days.*

*Please reference official quotation for lead time estimates.
